Media Statement

New York Transco President Victor Mullin Reinforces Importance of Clean Energy Transmission Noted in Governor Hochul’s State of the State

"We applaud Governor Hochul’s continued commitment to New York’s clean energy future. Continuing the modernization of the State’s electric transmission network is vital to creating the sustainable pathways needed to decarbonize New York State. 2023 will be a year of progress and a giant leap toward a cleaner, healthier and more vibrant New York as transmission projects begin delivering clean energy. Now, more than ever, we must work together – the State, communities, environmental groups, labor and industry – to keep innovating and bolstering the grid to best serve New York homes and businesses."

To further commemorate the shared commitment to advancing New York’s clean energy future, New York Transco today released a video featuring the New York Energy Solution, a clean energy electric transmission project under construction from the Capital Region through the Hudson Valley.
