

June 4, 2024

Construction Notice

Dear Neighbors,

Please accept this as notification from New York Transco (NY Transco) that, as early as June 4, 2024, you will start to see an increase of personnel and activity on the New York Transco-owned property at 2238 Route 22 Dover, NY. Should we receive appropriate permits and approvals from the Town of Dover Planning Board, construction would commence in early June on the Dover Station Project located at 2238 Rt 22 Dover, NY (Site). The general work window is Monday through Saturday between 7am and 9pm.

In the event of construction commencement, two main contractors will be on-site performing work – JW Didado and United Civil. The initial task will be site development and will consist of installing erosion and sediment controls, the clearing and grubbing of Site re-growth, and the removal of topsoil. Expected machinery includes excavators, bulldozers and dump trucks.

Once the bedrock has been exposed, Maine Blasting, a New York State Certified blasting company will perform a limited blasting program on the Site. The blasted rock will be crushed and will be used to increase the ground level of the site. Additional locally sourced aggregate will also be brought on site to supplement the crushed rock. The goal of this phase of the project is to create a safe, level working environment for the electrical construction phase of the project.

Safety is our top priority! As such, please do not enter the construction site or approach construction crews/equipment. If you need to speak to a project representative, please reach out either via phone or email with questions or for more information. Please anticipate future communications on our progress or various activities at the Site.

Enclosed is a fact sheet with more details on the Dover Station and our general construction process. We look forward to keeping you updated on progress and welcome your questions.

Thank you,

Shannon Baxevanis
Director of Communications & Public Affairs
New York Transco
